

AI Image & Thumbnail Prompt Pack

Product 32 - AI Image & Thumbnail Prompt Pack

Niche: AI + Social Media

Format: 50 image-generation prompts + design recipes

Perceived value: \$47

Great visuals get the click. This pack gives buyers **50 fill-in-the-blank prompts** for AI image tools (Midjourney, DALL-E, Leonardo, Ideogram, etc.) to create thumbnails, social graphics, ad creative, and more - no design skills needed.

What's inside

- This guide - how to prompt image AIs + the anatomy of a good prompt
- image-prompts.md - 50 prompts by use case

Anatomy of a strong image prompt

[Subject] + [style/medium] + [composition/framing] + [lighting/mood] + [color] + [details] + [aspect ratio/quality]

Example: "A confident creator at a laptop, flat vector illustration, centered composition, bright studio lighting, bold orange and navy palette, clean background with space for text, --ar 16:9"

Tips that instantly improve results

- **Be specific** - vague prompts give generic images.
- **Name a style** - "flat vector", "3D render", "photorealistic", "minimal line art".
- **Leave space for text** - for thumbnails/graphics, ask for "negative space" or "clean background on the left for text overlay".
- **Set aspect ratio** - 16:9 (YouTube/landscape), 9:16 (Reels/Stories), 1:1 (feed), 2:3 (Pinterest).
- **Iterate** - generate variations, then refine the best.
- **Add text separately** - most image AIs are weak at text; add headlines in Canva.
