## Pro tips for designed-not-templated results

- **Add your text later** - generators are weak at text; place headlines in FunnelHero's editor over the image.
  - **Always set aspect ratio** to fit the slot (16:9 hero, 1:1 cards/icons, 2:3 covers, 9:16 mobile/Stories).
  - **Ask for "space for text overlay"** on hero/banner shots.
  - **Match your brand colors** by naming the hex/colors in the prompt.
  - **Generate 2-3 variations** and pick the strongest.
