

Bonus 9 - The Split-Test Idea Bank

Bonus 9 - The Split-Test Idea Bank

90 ready-to-run split tests for FunnelHero AI

Value: \$397

How to use: Pick a test, create variant B by chatting the **edit** into FunnelHero AI, split your traffic, and let the built-in analytics pick the winner. ****Test ONE element at a time**** so you know what moved the needle. Metric to watch is noted per group.

Testing rules: 1 variable per test - enough traffic before deciding - keep the winner, then test the next element - re-test periodically.

A. Headlines (1-12) - *metric: scroll depth / conversion*

1. Benefit vs curiosity. "Make variant B a curiosity headline instead of benefit."
2. Short vs long. "Make variant B a headline under 8 words."
3. Question vs statement. "Make variant B a question headline."
4. With number vs without. "Add a specific number/timeframe to variant B's headline."
5. Problem-led vs result-led. "Make variant B lead with the problem."
6. Audience call-out vs general. "Make variant B call out [audience] directly."
7. Emotional vs logical. "Make variant B more emotional."
8. 'How to' vs bold claim. "Make variant B a 'How to [result] without [pain]' headline."
9. Specific vs vague. "Make variant B more specific with concrete details."
10. With subhead vs without. "Remove the subheadline in variant B."
11. Negative vs positive frame. "Frame variant B around avoiding [pain]."
12. Pre-headline (eyebrow) on/off. "Add an eyebrow line above the headline in variant B."

B. CTAs & Buttons (13-24) - *metric: click-through*

13. First-person vs second-person. "Make variant B's CTA first-person ('Start my...')."
14. Color A vs color B. "Change variant B's CTA button to [color]."
15. Short vs descriptive. "Make variant B's CTA more descriptive with a benefit."
16. With microcopy vs without. "Add 'no credit card required' under the CTA in variant B."
17. Urgency vs neutral. "Add urgency microcopy to variant B's CTA."

- 89. Logical vs emotional appeal. "Make variant B more emotional."
- 90. Different big promise. "Change variant B's core promise to [alternative promise]."

How to read the result

- Let each test run until you have enough conversions to be confident (not just clicks).
 - Compare the **primary metric** for that element (noted per group).
 - Keep the winner, make it the new control, and test the next element.
 - Re-test seasonally - audiences and markets shift.
-

90 tests. Stop guessing - chat an edit, split the traffic, and let the data crown the winner. One variable at a time.
