

Deal & Comparison Site Model

Product 55 - Deal & Comparison Site Model

Niche: Affiliate Marketing / SEO

Format: Site model + page structure templates

Perceived value: \$67

Some of the highest-earning affiliate sites are ****deal, coupon, and comparison hubs**** - they capture people at the exact moment of buying decision. This guide shows buyers how to build a deal/comparison site model that turns bottom-of-funnel traffic into commissions.

What's inside

- This guide - the model, page types, and how it captures buyers
- page-structures.md - templates for deal, coupon & comparison pages

Why this model converts so well

It targets people with the **highest buying intent** - those searching:

- "[product] coupon / discount / deal"
- "[product] pricing"
- "[category] comparison"
- "best [category] deals"

These searchers have their wallet out. You just help them decide and route them through your link.

The 3 page types

1. **Deal/offer pages** - current offers on tools in your niche, with your affiliate link + your bonus stack as the differentiator.
2. **Coupon/discountpages** - capture "[product] coupon" searches (only list real, legitimate offers/bonuses - never fake codes).
3. **Comparison/pricingpages** - side-by-side tables that help buyers choose (your recommended pick = your offer).

The honest-deal principle(critical)

- Only list **real** deals, discounts, and bonuses.
- If there's no coupon, your "deal" is your **exclusive bonus stack** (Product 25) -

that's a genuine, honest incentive fully in your control.

- Never use fake/expired codes or fake scarcity. It kills trust and can violate rules.

How the bonus stack becomes your "deal"

You usually can't control a vendor's price. But you *can* offer something no other affiliate does: **your bonus bundle**. So your deal pages say: "Get [PRODUCT] through us and unlock \$[value] in exclusive bonuses." That's your honest, unique deal.

Structure that ranks + converts

- Clear, scannable tables and offer cards.
- Updated dates ("Updated [month] 2026") for freshness.
- Prominent CTAs to your bonus page (Product 2).
- Trust elements: honest notes, pros/cons, disclosure (Product 28).
- Internal links between deal, comparison, and review pages (Product 11).

How to use (for the affiliate)

1. Pick a niche with tools that have ongoing offers/recurring commissions.
2. Build deal, coupon, and comparison pages (page-structures.md).
3. Make your **bonus stack** the differentiator on every page.
4. Target buyer-intent keywords (Product 31) + keep offers honest and current.

Deal, Coupon & Comparison Page Templates

Replace [PRODUCT], [CATEGORY], [VALUE], [LINK]. List only REAL deals/bonuses.
