

AI Market Research & Customer Avatar Kit

Product 39 - AI Market Research & Customer Avatar Kit

Niche: AI + Affiliate Marketing

Format: Research prompts + avatar worksheet

Perceived value: \$57

You can't sell to someone you don't understand. This kit uses AI to do ****deep** market research and build a detailed customer avatar in minutes****** - so buyers write copy that hits, pick offers that fit, and target the right people.

What's inside

- This guide - the research process + how to use the outputs
- research-prompts.md - AI prompts + an avatar worksheet

Why research beats guessing

Most affiliates write copy based on what *they* think matters. Winners write based on what the *market* actually wants, fears, and says. AI lets you simulate and synthesize that research fast - then you validate it against real audience language.

What you'll uncover

1. **The avatar** - who they are, day-to-day, demographics + psychographics.
2. **Pains** - the problems keeping them up at night.
3. **Desires** - the outcomes they crave.
4. **Objections** - why they hesitate to buy.
5. **Language** - the exact words/phrases they use (gold for copy).
6. **Buying triggers** - what makes them finally act.

The research workflow

1. Describe your niche/offer to the AI
2. Generate the avatar + pains/desires/objections
3. Extract their language (phrases, fears, dreams)
4. Validate against real sources (reviews, comments, forums)

5. Feed it into your copy (Products 17, 34) and offer selection (Product 20)

Validation matters: AI gives you a strong starting hypothesis. Confirm it by reading real reviews, social comments, and community posts in your niche.

Where the research pays off

- **Copy** - use their exact words in headlines/emails (Products 17, 34).
- **Offer fit** - pick offers that match real pains (Product 20).
- **Lead magnets** - create freebies they actually want (Product 6).
- **Targeting** - better audiences for ads (Product 13).
- **Content** - topics that resonate (Products 3, 31).

How to use (for the affiliate)

1. Run the research prompts for your niche/offer (research-prompts.md).
2. Fill the avatar worksheet with the outputs.
3. Validate against real reviews/comments.
4. Plug the language + pains into your copy and offers.

AI Market Research Prompts + Avatar Worksheet

Run these in any AI tool. Replace [NICHE], [PRODUCT], [AUDIENCE]. Then validate against real reviews/comments.

Research prompts

1. Build the avatar

"Act as a market researcher. Create a detailed customer avatar for [AUDIENCE] interested in [NICHE]. Include: demographics, psychographics, daily routine, goals, frustrations, what they've already tried, and where they hang out online."

2. Pains

"List the top 10 pains, fears, and frustrations [AUDIENCE] have around [NICHE]. For each, give the underlying emotion."

3. Desires

"List the top 10 desires and dream outcomes [AUDIENCE] want related to [NICHE]. Rank by how urgently they want each."

4. Objections

"What are the 10 most common objections or hesitations [AUDIENCE] have before buying a product like [PRODUCT]? For each, suggest a reassurance."

5. Their language (copy gold)

"Write 15 phrases [AUDIENCE] would actually say when describing their problem"

with [NICHE] - in their own casual words, not marketing speak."

6. Buying triggers

"What events, emotions, or moments would trigger [AUDIENCE] to finally buy a solution like [PRODUCT]?"

7. Hooks from the research

"Based on the pains and desires above, write 10 hooks/headlines that would grab [AUDIENCE]'s attention immediately."

8. Objection-handlingcopy

"For each top objection above, write a one-paragraph rebuttal I can use in my emails and on my bonus page."

9. Validate (what to look for)

"List the best places to validate this research for [NICHE] (specific review sites, subreddits, forums, social hashtags) and what to look for in each."

10. Synthesize

"Summarize all of the above into a one-page 'message map': who they are, their #1 pain, their #1 desire, their top objection, and the 3 phrases I should use most."

Customer Avatar Worksheet (fill from the outputs+ validation)

Identity

- Name/label: _____
- Age / stage / situation: _____
- Where they spend time online: _____

Pains (top 3)

1. _____
2. _____
3. _____

Desires (top 3)

1. _____
2. _____
3. _____

Top objections(top 3)

1. _____
2. _____
3. _____

Their words (phrases to use in copy)

- _____
- _____
- _____

Buying triggers

- _____

Message map (one line each)

- They are: _____
 - #1 pain: _____
 - #1 desire: _____
 - Main objection: _____
 - Phrases to repeat: _____
-

AI gives the hypothesis; real reviews confirm it. Then write copy in their words - that's when conversions jump.
