

AI Content Repurposing System

Product 8 - AI Content Repurposing System

Niche: AI + Social Media

Format: Workflow guide + repurposing prompts

Perceived value: \$57

Create once, post everywhere. This system shows buyers how to turn **one** piece of content into **10+** across platforms using AI - so they stay consistent (the #1 driver of affiliate sales) without burning out.

What's inside

- This guide - the "1-to-10" repurposing workflow + content tree
- prompts.md - the AI prompts that do each transformation

The "1-to-10" content tree

Start with **one pillar asset** (a blog post, video, or long caption). Branch it:

From one pillar you realistically get: 1 email, 1 X/Twitter thread, 1 LinkedIn post, 1 carousel, 3 short-video scripts, 5 standalone captions, and a handful of quote graphics. That's **10+ posts from one idea**.

The weekly workflow(2 hours -> a week of content)

Step	Time	Action
1	20 min	Create or pick ONE pillar piece
2	15 min	Run the "extract key points" prompt
3	30 min	Generate platform versions (prompts 2-6)
4	20 min	Edit for your voice + add CTAs
5	15 min	Schedule across the week

Repurposing rules that keep it converting

1. **One idea per piece** - don't cram; clarity wins reach.
2. **Native formatting** - a tweet isn't a caption isn't an email. Reformat, don't paste.
3. **Spread the CTA** - most pieces give value; ~1 in 5 points to your offer.
4. **Recycle winners** - top performers can be re-posted in 30-60 days, reworded.
5. **Batch + schedule** - consistency beats intensity for affiliate trust.

Pair this with Product 3's calendar (what to post) - this product is how to produce it fast.

Repurposing Prompts

Works with any AI (ChatGPT, Claude, Gemini). Paste your pillar content where it says [PASTE PILLAR], then run each prompt. Replace [PRODUCT] / [LINK].

Step 1 - Extract the core

"Here's my pillar content: [PASTE PILLAR]. Extract: (a) the single big idea in one sentence, (b) the 5 key takeaways, (c) the best quotable line, and (d) the target reader. Keep it tight."

Step 2 - Email

"Using these takeaways, write a 150-word email in a friendly, conversational tone. Hook in the first line, deliver one takeaway, and end with a soft CTA to [PRODUCT]: [LINK]. Give me 3 subject line options too."

Step 3 - X/Twitter thread

"Turn the big idea and takeaways into a 6-tweet thread. Tweet 1 is a strong hook, tweets 2-5 deliver value (one idea each, under 280 chars), tweet 6 is a CTA to [PRODUCT]. No hashtags."

Step 4 - LinkedIn post

"Write a LinkedIn post (under 200 words) from the big idea. Start with a 1-line hook, use short single-sentence paragraphs, share a lesson, and end with a question to drive comments. Soft-mention [PRODUCT] at the end."

Step 5 - Instagram/LinkedIn carousel

"Create a 7-slide carousel from the takeaways. Slide 1 = hook title, slides 2-6 = one takeaway each (max 20 words), slide 7 = CTA to [PRODUCT]. Give me the on-slide text plus a caption."

Step 6 - Short-video scripts(x3)

"Write three 30-second short-video scripts (TikTok/Reels/Shorts) each based on a different takeaway. Each: a 3-second hook, the value, and a CTA to check my link for [PRODUCT]. Include suggested on-screen captions."

Step 7 - Standalone captions (x5)

"Write 5 standalone social captions from this content - one each in these tones: educational, story, contrarian, list, and urgent-promo (the promo one CTAs to [PRODUCT])."

Step 8 - Quote graphics text

"Pull 5 punchy, quotable one-liners from this content I can put on quote graphics. Each under 12 words."

Step 9 - Repurpose across formats (catch-all)

"Take this [blog post / video transcript] and give me: 1 email, 1 X thread, 1 LinkedIn post, 1 carousel outline, and 3 short-video hooks. Keep my CTA to [PRODUCT] natural, not salesy. Content: [PASTE PILLAR]."

Step 10 - Next-week hook bank

"Based on the topic of this content, generate 15 fresh hook lines I can use to create next week's posts for [NICHE]. Mix curiosity, benefit, and contrarian styles."

10 prompts = one pillar into a full week of platform-native content.
