Affiliate Bonus Vault

Ready-to-use digital products you can attach as **bonuses** to any promotion on WarriorPlus, JVZoo, or LaunchpadJV. Each product is self-contained, niche-relevant (affiliate marketing / AI / social media), and written to be repackaged, rebranded, and delivered to buyers immediately.

How to use these bonuses

1. Pick the products that match the offer you're promoting.
2. (Optional) Rebrand - swap [Your Name], [Your Brand], and links for yours.
3. Export to PDF (for guides/checklists) or upload the HTML (for the bonus page).
4. Deliver via your autoresponder, a download page, or your WarriorPlus/JVZoo "Deliver Bonus" feature.
5. Announce the bonus in your promo emails and on the bonus page.

Tip: Bonuses convert best when they remove the next obstacle the buyer hits right after purchasing the front-end offer. Stack 3-5 of these per promo.
