

Outsourcing & Scaling Playbook

Product 43 - Outsourcing & Scaling Playbook

Niche: Affiliate Marketing (advanced)

Format: Delegation system + hiring & SOP templates

Perceived value: \$77

There are only so many hours in your day. To scale past a solo grind, you delegate. This playbook shows buyers **what to outsource first, how to hire, and how to hand off work** so their affiliate business grows beyond their own time.

What's inside

- This guide - what to delegate + the hiring process
- delegation-templates.md - role briefs + a hiring checklist

When to start outsourcing

Outsource once a task is **repeatable, documented, and not the best use of your time** - and you have income to reinvest. Start small (a few hours/week) and grow.

What to outsource first (in order)

1. **Repetitive admin** - scheduling, formatting, uploading, data entry.
2. **Content production support** - editing video/graphics, repurposing (Product 8).
3. **Content creation** - drafting posts/blogs from your outlines (you approve).
4. **Engagement** - replying to comments/DMs from a script (Product 27).
5. **Specialized work** - SEO, ads management, design (as you scale).

Keep **strategy, key relationships, and your "voice"** for yourself (at least early).

The hire-to-handoff process

1. Document the task (SOP) -> 2. Write a clear role brief -> 3. Source candidates -> 4. Test with a small paid task -> 5. Onboard with the SOP -> 6. Review + refine

Where to find help

- Freelance marketplaces (general VAs, designers, editors, writers).
- Niche communities/job boards for marketing VAs.
- Referrals from other affiliates/creators.

Start with project-based or part-time before committing to full-time.

Writing SOPs (so handoff actually works)

An SOP = a simple step-by-step doc (or screen recording) of exactly how you do a task. Rule: **if you've done it 3 times, document it**. Good SOPs make people replaceable-proof your business and make training fast.

Managing without micromanaging

- Give outcomes + standards, not just tasks ("publish 5 posts that match this style").
- Use a simple task board (Trello/Asana/Notion).
- Weekly check-in + async updates.
- Review quality against the SOP; refine the SOP, not just the person.

The scaling mindset

You're moving from **doing the work** to **owning the system**. Your job becomes: strategy, hiring, quality control, and growth. Pair this with automation (Product 19) - automate what you can, delegate what you can't.

How to use (for the affiliate)

1. List your repetitive tasks; pick the first to delegate.
2. Write an SOP for it (delegation-templates.md).
3. Hire small + test before committing.
4. Onboard with the SOP, review, and refine. Repeat.

Delegation Templates

SOP template (use for every recurring task)

Task: [name]

Goal / outcome: [what "done well" looks like]

Frequency: [daily/weekly/per project]

Tools needed: [list + logins location]

Steps:

1. _____

2. _____

3. _____

Quality standards: [checklist of what good output includes]

Common mistakes to avoid: [list]

Who to ask if stuck: [you / contact]

(Attach a screen recording if helpful.)

Role brief template (for hiring)

Role: [e.g., Video Editing VA]

About us: [1-2 lines about your brand/niche]

What you'll do: [3-5 bullet tasks]

Must-have skills: [list]

Nice-to-have: [list]

Hours/commitment: [part-time/project]

Pay: [rate / per-project]

How to apply: *[instructions + a small filter task, e.g. "include the word BANANA so I know you read this"]*

Test-task template (before you commit)

*Thanks for applying! Before we move forward, here's a small **paid** test task:*

[specific, small version of the real work]. Please complete it by [date] and include [deliverable]. This helps me see your work + communication style.

Onboarding checklist

- ☐ Share the SOP for their first task
- ☐ Give access to required tools (use a password manager)
- ☐ Set up the task board (Trello/Asana/Notion)
- ☐ Agree on communication channel + check-in cadence
- ☐ Define "done" and quality standards
- ☐ Start with 1-2 tasks; expand as trust builds

First tasks to delegate (priority order)

Priority	Task	SOP written?
1	Scheduling/posting content	☐
2	Video/graphic editing	☐
3	Repurposing pillar content	☐
4	Drafting posts/emails from outlines	☐
5	Comment/DM engagement	☐
6	Research / link checking	☐

Weekly management routine

- ☐ Monday: assign the week's tasks on the board

- [] Midweek: quick async check-in
 - [] Friday: review output vs. standards; update SOPs
 - [] Note what to delegate next
-

Document, delegate, review, refine. Build the system once and it keeps running without you in every detail.
