Niche: Social Media / Traffic

Format: Strategy + pin templates + 30-day plan

Perceived value: \$47

Pinterest is a search engine disguised as a social network - pins drive clicks for months or years, making it perfect for evergreen affiliate traffic. This playbook shows buyers how to turn Pinterest into a hands-off click machine.

What's inside

- This guide - how Pinterest works + the affiliate traffic system
- pin-templates.md - pin title/description swipes + a 30-day plan

Why Pinterest works for affiliates

- **Long shelf life:** a pin can drive traffic for years (vs hours on other apps).
- **Buyer intent:** people search Pinterest to *plan and buy*.
- **Low competition for effort:** consistency beats follower count.
- **Visual:** great for "best [product]", how-tos, and listicles.

The golden rule (compliance)

Most affiliate programs and Pinterest prefer you **pin to your own content** (blog post, review, bonus page) rather than dropping raw affiliate links. Pin -> your page -> affiliate link. Safer, and it builds your asset.

The Pinterest traffic system

1. **Set up a business account** (free analytics + rich pins).
2. **Optimize your profile** with keywords your audience searches.
3. **Create keyword-rich boards** around your niche sub-topics.
4. **Design vertical pins** (2:3 ratio, bold text overlay, clear benefit).
5. **Pin consistently** (5-15/day, mix fresh + repins).
6. **Link each pin to your content** (review/blog/bonus page).
7. **Double down on top performers** (make more pins like your winners).

Pin design that gets clicks

- Vertical (1000x1500px), bright, high-contrast.
- Bold text overlay stating the benefit/result.
- Readable on mobile (most traffic is mobile).
- 2-3 pin designs per piece of content (test which wins).

What to pin (content types)
