- page-templates.md - fill-in-the-blank outlines for each page

The site architecture that ranks

```

HOMEPAGE (positions you + links to best content)
|
+-- "Best [category]" pillar pages    <- highest buyer intent
+-- Individual product reviews       <- "[product] review"
+-- Comparison posts                 <- "[A] vs [B]"
+-- Helpful how-to / info posts      <- builds topical authority
+-- About / Disclosure / Contact     <- trust + compliance
```

Internal links flow from info posts -> reviews -> "best of" pillars, concentrating authority on your money pages.

The 4 money-page types (ranked by buyer intent)

1. **"Best[category]for [audience]" pillar** - *highest intent*. Compares your top picks; #1 pick is your main offer.
2. **Single product review** - "[product] review" searchers are close to buying.
3. **Comparison ("X vs Y")** - captures people deciding between two options.
4. **Alternatives ("best `[product]` alternatives")** - captures dissatisfied users.
