Product 14 - AI Tools Directory for Affiliates

Niche: AI + Affiliate Marketing

Perceived value: \$57

AI tools are one of the hottest, highest-commission affiliate niches right now. This directory organizes the **AI tool landscape** into categories affiliates can promote, with the angle, audience, and content ideas for each - so buyers always know what to promote and how.

What's inside

- This guide - the AI tool categories + how to promote each
- promo-angles.md - content angles + hooks per category

How to use this directory

You don't promote "AI" - you promote a *specific tool solving a specific problem* for a *specific person*. Use the categories below to pick a lane, then find offers in that lane on WarriorPlus / JVZoo / LaunchpadJV (or major affiliate networks).

Always test a tool before promoting it, and disclose your affiliate relationship.
